

### Memory game instructions

- Put the power point on slideshow and go through each: ‘How many can you remember?’ slide (which has a group of pictures on a common theme) with your child.
- Show the page of pictures for 10 seconds and move on to the slide showing ‘time to think’ and give your child (half a minute) to write down all the pictures they can remember.

The slides start with 3 pictures to remember, moving on to 7 pictures. Once, you have completed the power point you could move on to playing practical memory games with you child. When I was child, I played the tray game with my parents where we put 10 objects on a tray and looked at them for a minute. Afterwards, we wrote down all the objects we could remember to see who had remembered the most!

Have fun playing the game!
